Subject: IRAS 330418. REC Application Valid under Consideration

Dear Prof Moppett,

Following my previous email about the study being valid under consideration, I wished to let you know that until the need for CAG review, and therefore REC review, has been resolved, the study will remain valid under consideration and will not be considered at the REC meeting on 05 February 2024. If it is confirmed the study does require CAG, then we will arrange to have the study reviewed by a REC as soon as possible. **If it is does not require CAG, then the study will simply be assessed for HRA Approval and will not require any REC review.**

Kind regards

Rachel Katzenellenbogen
